1- What is the difference between Em and Rem units?
   a. Em: Relative to the font-size of the element (2em means 2 times the size of the current font)
   b. Rem: Relative to font-size of the root element

Selectors task

```css
/* select p elements and make them red */
p{
    color: red;
}
/* select p and div elements  */
p,div{
    background-color: red;
}
/* select p with class mainClass direct child for div with id myDiv and make it styled  */
#myDiv > p.mainClass {

  color: blue;

}
/* select all p inside div and style them  */
div p{
    color : red ;
}
/* 5- select input with type text element with class myClass */
input[type="text"].myClass{
    color : red ;
}
```

```css
/* 6- select span elements after div  */
div ~ span{
    background-color: red;
}
/* 7- select p with class myClass  */
p.myClass{
    color: red;
}
/* 8- select div with id myDiv  */
#myDiv{
    background-color: red;
}
```
